When **energy** matters

socomec
Innovative Power Solutions

DIRIS Digiware

Power monitoring, accessible everywhere, for everyone

The DIRIS Digiware system is a hub of technological innovations that revolutionizes the world of electrical measurement, bringing a high degree of flexibility to installations and making connection and configuration easy.

These innovations, together with unrivaled performance in terms of accuracy and functionality, make DIRIS Digiware the most effective solution for metering consumption, and for measuring and monitoring the quality of electrical energy in industrial and commercial applications.

Flexible

- First measurement system that is 100% customizable and scalable.
- Complete Socomec solution: from the power monitoring devices to the current sensors, including the visualization and analysis software
- Compatible and interoperable ecosystem.

Accessible to all

- For the measurement of AC and DC loads.
- Use one measurement system from the main incomer to branch circuit monitoring and DC loads.
- Implementation in a quarter of the time for multi-point measurement.

Powerful & innovative

- RJ45 interconnection of modules (Digiware bus).
- Fast RJ12 current sensor connection.
- The best compactness/performance ratio of the market: Digiware S embeds the power monitoring function and 3 current sensors all in one.

Groundbreaking technologies for greater simplicity and performance*

PreciSense

Be guaranteed of the accuracy of your measurements

- For the global measurement chain.
- For reliable measurements.
- For relevant corrective actions.

VirtualMonitor

Access the monitoring of your protective devices

- On your entire electrical installation.
- Remotely and in real-time.
- Without additional hardware or wiring.

AutoCorrect

Be guaranteed your measurement system is working correctly

- Automatic wiring control.
- Correction of errors.
- Feature available off-load.

* Only available with DIRIS Digiware AC.

VirtualMonitor and AutoCorrect are available with:

DIRIS A-40 and DIRIS Digiware I
Associated with iTR sensors

DIRIS Digiware S

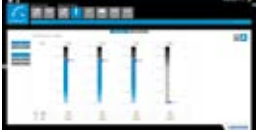

Put together your own AC or DC metering and monitoring system

A single point of access to AC and DC measurement data for local or remote analysis

1

DIRIS Digiware D

WEBVIEW-M

Voltage acquisition modules for AC or DC measurement

2

DIRIS Digiware U

DIRIS Digiware Udc

Current acquisition modules for AC or DC measurement

3

DIRIS Digiware S
All-in-one with 3 integrated current sensors

DIRIS Digiware I *DIRIS Digiware Idc*
To be associated with external AC or DC sensors

Solid-core and split-core current sensors for AC or DC measurement

Infrastructure

A single point of access to AC and DC measurement data

DIRIS Digiware D

DIRIS Digiware D remote displays offer:

- A local view of the measurement data from DIRIS Digiware U, I, S and IO modules.
- A 24 VDC control power for the entire DIRIS Digiware system.
- The gateway function: an access to data over Ethernet (D-50/D-70) or RS485 (D-40).

APPL_637_C

Multi-protocol (D-50/D-70):
Modbus TCP, BACnet IP,
SNMP v1, v2, v3.

Analysis and monitoring software
WEBVIEW-M integrated in the D-70.

Automatic and secured export
of data via FTPS.

Ports	D-40	D-50	D-70
Inputs	Digiware	Digiware / RS485	Digiware / RS485
Outputs	RS485	Ethernet	Ethernet
Protocols	Modbus RTU	Modbus TCP / BACnet IP SNMP v1, v2, v3	Modbus TCP / BACnet IP SNMP v1, v2, v3
Websserver	-	-	WEBVIEW-M

Solution without screen DIRIS Digiware C-31

DIRIS-DW_142_AEFS

For applications without a local display, the DIRIS Digiware C-31 interface centralizes all of the system's data and communicates them via an RS485 Modbus output.

AC or DC voltage acquisition modules

DIRIS Digiware U

The DIRIS Digiware U and Udc modules measure the voltage reference for the entire DIRIS Digiware AC and DC system. The RJ45 Digiware bus transmits the voltage measurement as well as power supply to all products connected to the Digiware bus.

Flexible

A complete, dedicated offer for metering, monitoring and quality analysis of the voltage supplied to AC or DC electrical installations.

Safe

No hazardous voltage on panel doors.

Applications	AC voltage measurement			DC voltage measurement	
	Metering	Monitoring	Analysis	Analysis	Analysis
DIRIS Digiware U	U-10	U-20	U-30	U-31dc	U-32dc
Measuring range (min-max)	50-300 VAC Ph/N			19.2 VDC - 60 VDC	48 VDC - 180 VDC
Multi-measurement AC					
U12, U23, U31, V1, V2, V3, f	•	•	•

Vrms				•	•
Alarms (threshold)			•	•	•
History of average values			•	•	•
Format/Number of modules	0.71 in/1	0.71 in/1	0.71 in/1	0.71 in/1	0.71 in/1

U500dc, U1000dc and U1500dc adaptors To be combined with a DIRIS Digiware Udc module

The DC voltage adaptors are optionally used in addition to Udc voltage acquisition modules enabling the measurement of higher voltages up to 1500 VDC. These adaptors make the DIRIS Digiware DC system suitable anywhere along the low voltage DC electrical distribution, regardless of the voltage level.

All-in-one current acquisition modules

DIRIS Digiware S

DIRIS Digiware S is a Power Metering and Monitoring Device with 3 integrated current sensors enabling the measurement of one three-phase or three single-phase circuits up to 63 A. Opt for the DIRIS Digiware system, combining Digiware I modules with external sensors for the monitoring of incomers and subfeeds, and Digiware S modules for outgoing branch circuits. Thanks to Digiware, you have access in record time to high-end monitoring of your entire new or existing electrical panel.

DIRIS-DWL127-PSD

APPL1811EFS

Compact

DIRIS Digiware S is the combination of a DIRIS Digiware I module and 3 current sensors associated with 3 RJ12 cables. Matching the spacing of protective devices, Digiware S modules solve issues of space constraints inside electrical panels.

Intelligent

DIRIS Digiware S can be mounted upstream or downstream of the protective device. The VirtualMonitor technology allows an advanced monitoring of the protective device (position, trip etc.) without using auxiliary contacts. The phase sequencing detection and configuration are automatic thanks to the AutoCorrect technology.

DIRIS Digiware S	S-130	S-135	S-Datacenter
Number of current inputs	3	3	3
Application	Metering	Analysis	Single-phase monitoring

AC or DC current acquisition modules

DIRIS Digiware I

The DIRIS Digiware I and Idc modules are associated with external current sensors for metering, monitoring and analysing the quality of AC and DC loads. The RJ45 connection allows you to quickly add up to 32 DIRIS Digiware I or Idc modules, therefore enabling the monitoring of a large number of loads.

DIRIS Digiware I

DIRIS Digiware Idc

Plug & Play

- RJ45 interconnection of modules (Digiware bus).
- Fast RJ12 connection of current sensors.
- Automatic configuration of connected current sensors load type, sensor type and rating, verification of current flow direction.

Efficient

- A complete range dedicated to the metering, monitoring and analysis of the quality of AC or DC loads.
- Available in versions with 3, 4 or 6 outgoing circuits.

Removable connector

The removable Digiware connector allows you to disconnect a Digiware module from the bus, while ensuring the continued operation of the rest of the DIRIS Digiware system. This accessory is very useful in applications using pullout drawers or critical applications such as data centers.

AC or DC current sensors

Smart sensors

- Sensors with an extended operational range.
- Automatic rating configuration.
- Safe disconnection of the current sensor under load.
- Fast connection via RJ12 and color coded identification of cables.

Compact

- The most compact in the market.
- Linear assembly.
- Staggered assembly.
- Match the pitch of protective devices.

PreciSense

Better than revenue grade, accuracy for the global measurement chain including current sensors on the full scale (from 2 to 120% In):

- class 0.5 with TE, iTR, or TF current sensors.
- class 1 with TR sensors

TE solid-core sensors	Rated currents (A)											Real range covered (A)	Pitch (in/mm)	Aperture (in/mm)	Dimensions (in/mm)	
	5	20	25	40	63	160	250	400	600	630	1000					2000
TE-90													12 ... 2400	3.54/90	2.52 x 2.52 64 x 64	4.96 x 3.54 x 0.97 126 x 90 x 24.6
TE-55													8 ... 1200	2.16/55	1.61 x 1.61 41 x 41	3.93 x 2.16 x 1.28 100 x 55 x 32.5

TF-55								3 ... 720	Ø 55

DC current sensors

DC current sensors measure the load currents of a DC electrical installation and transmit the information to DIRIS Digiware ldc modules via a quick RJ12 connection with color-coded cables for an easy identification of circuits. The range comprises solid-core and split-core sensors, from 50 to 5000 A in various sizes, suitable for new or retrofit applications.

- Easy connection to prevent wiring errors.
- Up to 3 sensors on each DIRIS Digiware ldc measurement module.

5 Input/output modules

DIRIS Digiware IO

The DIRIS Digiware IO input/output modules enrich the measurement system with multiple features.

- The IO-10 modules have 4 digital inputs and 2 digital outputs, which can be used:
- To monitor the position of protective devices and pull-out drawers (open/closed, trip).
 - To monitor changes of status of an input.
 - To collect pulses from multi-fluid meters (water, gas...).
 - To remotely command devices by sending a digital output signal.

- The IO-20 modules have 2 analog inputs allowing:
- To collect data from analog sensors, e.g. pressure, humidity, temperature, levels (fuel...).
 - To access via communication the measurements from devices with analog outputs.
 - To monitor levels by setting up alarms on chosen thresholds.

The IO modules can be easily added anywhere within the measurement system thanks to a quick RJ45 connection. Their modular format allows the quick connection of a large number of modules.

All the reported information is accessible from the displays, from our WEBVIEW software solution or from any other centralized management software.

Applications	Monitoring	Metering
DIRIS Digiware IO	IO-10	IO-20
Number of digital inputs/outputs	4/2	-
Number of analogue inputs	-	2
Multi-tariff (max. 8)	•	
Alarms (threshold)	•	•
Alarms (change of status)	•	
History of average values		•
Format/number of modules	0.71 in/1	0.71 in/1

WEBVIEW energy server solution embedded in the communication gateways

The embedded software solution WEBVIEW is used for visualization and analysis of real time as well as historical measurements from a large number of connected devices.

Embedded
EMS

No installation required: WEBVIEW analysis and monitoring software is integrated in DIRIS G, DIRIS Digiware D 70 and DATALOG H products.

Connected
to the cloud

DIRIS Digiware D-70, DIRIS G and DATALOG H products are connected to the cloud offering a higher level of analysis.

Photoview
functionality

Display of electrical parameters from multiple devices on a customized background picture such as an electrical diagram or a site drawing.

Monitoring and alarms

- Measurement in real-time of electrical values.
- Power quality analysis of the grid and loads.
- Alarms whenever thresholds are exceeded.
- Summary of alarms in progress and log of finished alarms
- Sending of alarms by e-mail.

Viewing

- Graphical visualization of real-time and historical values.
- High storage capacity of historical records of measurements and consumptions.
- User-customizable overview of the electrical installation.
- Cartography of the metering system.

Analysis

- Analysis of energy consumption.
- Distribution by location, usage and fluid type.
- Secured automatic export of data in CSV format.

WEBVIEW-L solution

WEBVIEW-L is available as an integrated software solution with the DATALOG H:

- Connection of up to 200 devices.
- Retrieval of data from third-party applications and equipment.
- Display of measurements from multiple devices on a single graph.
- Data export through 3G connection.
