RIDGID® Professional - Industrial Vacs are built with a commitment to superior performance, technology and quality.

MOTOR ON BOTTOM

50338 1650RV
50333 1250RV

THE MOST POWERFUL RIDGID® VAC EVER
24% greater than our previous best.

- **STABLE**
Low center of gravity provides stability.
- **EASY TO EMPTY**
Filter stays in drum when emptying, allowing for easier, cleaner debris disposal. Drum detaches from the power sled/cart with quick-slide lock lever.
- **HANDS-FREE**
Foot-activated power switch allows for easy access and hands-free operation.

50373 RV3410 SMART PULSE™ VAC

- 1** Airstream puffs into filter.
- 2** Filters alternate pulsing.
- 3** Vacuum stream continues uninterrupted.

The Smart Pulse™ vac is designed with two filters and an integrated sensor. The sensor is continuously monitoring suction efficiency. When a pressure difference inside the vac vs. the outside of the filter is recognized by the sensor, the vac begins an alternating pulsing cycle, back-flushing air through the filter. This process cleans the filter automatically, yet only when needed, providing uninterrupted performance and maximizing efficiency.

RIDGID® Professional-Industrial Vacs Provide:

- Powerful performance
- Rugged, long-lasting construction
- Thoughtful on-board accessory storage
- Innovative designs that provide versatility
